EXPERIENCE

Software Engineer at Deloitte

March 2022 - Present

- I have recently started working at Deloitte as a developer at analyst level.

Student at Makers Academy

November 2021 - February 2022

- 16 week highly selective Software Engineering course with 10% acceptance rate.
- Agile, test driven development of weekly projects using RSPEC, Jest and Capybara.
- Daily pair programming using driver, navigator approach.
- Built an AirBnB clone using Ruby and PostgreSQL.
- Built a lending and borrowing app as part of a team using a MERN stack.

Shadowing Front-end Dev team at Infopro Digital

February 2021 - October 2021

- Responding to tickets, making version controlled updates using command line git.
- Git pushing, merging, resolving conflicts and deploying to dev and production. Compiling with Grunt.js.

UX Design course at General Assembly

February 2021

- 7 day intensive UX design course where I learned key UX principles, user researching, user stories, personas, affinity mapping, wireframing and prototyping.
- I surveyed over 50 people and designed a book recommendations app using Figma.

Webinar Producer at Infopro Digital

April 2016 - October 2021

- Broadcasting webinars and setting up registration pages for leading Financial clients.
- Iterating over reg page designs, A/B testing, improving conversion rates.
- Making HTML and CSS changes. Gathering user feedback.

Freelance web developer

Nov 2016 - March 2019

- Editing and installing wordpress themes for non-profits and small businesses (Limehut.co.uk, girlsonfilmLDN).
- HTML, CSS, jQuery custom changes
